Collaborative Robots 2025-2045: Technologies, Players, and Markets

Collaborative robots (cobots), mobile manipulators, end-effectors, sensors, grippers, automotive manufacturing, picking and placing, palletizing, packaging, food and beverage, electronics, EV Li-ion battery

- Sign Up
- Login
- Market leaders and small emerging start-ups
- Detailed overview of leading cobot manufacturers
- Detailed price, payload, and reach comparisons.
- Benchmarking studies between different commercially available cobots.
- Overview of the use of cobots by end industries and tasks.
- Detailed regional SWOT analysis of the automotive manufacturing industry and how cobots are expected to help them overcome the challenges.
- Analysis of regulations (e.g., Industry 5.0, Made in China 2025, Smart Factory 2025, etc.) and leading car-making companies' proposals and how these will accelerate the adoption of cobots.
- Detailed analysis of cobots in the food and beverage industry. Analysis of high mix low volume model and how cobots are used for packaging, palletizing, etc.
- Outlook of cobots in the electronics industry covering several case studies and investment analysis of large electronics suppliers.
- Analysis of cobots in the hospitality and healthcare industry.
- Analysis of cobots in the EV Li-ion battery recycling industry covering case studies and steps of a typical cobot in battery disassembly.
- Analysis of cobots in the photovoltaics industry.
- Analysis of cobots for picking and placing, material handling, quality inspection, and the benchmark for payback time and ROI.
- Analysis of cobot adoption barriers and potential solutions to these barriers.
- Progression toward mobile cobots, current technological hurdles, and the trend of partnerships between cobot makers and mobile robot makers.
- Analysis of end-effectors (e.g., grippers, sensors, sanding tools, etc.), along with several profiles of leading end-effector suppliers.
- Analysis of sensory systems in cobots and the emerging sensors that can enhance safety levels.

- Analysis of AI in the cobots, such as computer vision, natural language processing (voice recognition), etc.
- Provide an overview of cobot component suppliers and an analysis of two leading cobot controller suppliers, NVIDIA and AMD.
- Primary information from key profiled companies.
- 20-year market forecasts for collaborative robots in volume sales and revenue.
- 20-year market forecasts for collaborative robots in different regional markets (APAC, North America, Europe, and the Rest of the World).
- 20-year forecast for cobot end-effectors.
- 20-year forecast of cobot sale volume in the automotive manufacturing industry.
- 20-year granular analysis of volume sales and revenue of collaborative robots by 12 tasks in different industries.
- 20-year market forecast for cobot sales volume for chip quality inspection
- 20-year market forecast for cobot sales volume for the automotive assembly and automotive surface finishing.

Report Metrics

Details

Historic Data

2019 - 2024

CAGR

The global market of cobots is expected to grow by a CAGR of 22.8% over the next 20 years

Forecast Period

2025 - 2045

Forecast Units

US\$, Unit (thousands)

Regions Covered

All Asia-Pacific, Europe, North America (USA + Canada)

Segments Covered

Mobile cobots, cobots in automotive, semiconductor, EV Li-ion battery, photovoltaics, food and beverage, electronics, hospitality and healthcare, picking and placing, palletizing, packaging, material handling, and quality inspection. End-effectors, sensors, and AI software for collaborative robots.

1.

EXECUTIVE SUMMARY

1.1.

Collaborative robots (Cobots)

1.2.

Three phases of cobot adoption

1.3.

6 stages of human-robot interaction (HRI)

1.4.

Traditional industrial robots vs. collaborative robots

1.5.

Benefits of industrial robots vs. collaborative robots

1.6.

Benefits of cobots - key takeaways

1.7.

Drawbacks of cobots - key takeaways

1.8.

Safety requirement for cobots - five main types

1.9.

Cobot market size forecast by 12 end-user industries: 2025-2045

1.10.

Cobot market size forecast tables by 12 industries and tasks: 2025-2045

1.11.

Cobot volume forecast by end-user tasks and industries: 2025-2045

1.12.

Cobot volume forecast tables by end-user industry and task: 2025-2045

1.13.

Cobot volume forecast by task: 2025-2045

1.14.

Cobot volume forecast table by task: 2025-2045

1.15.

Overview of commercialized cobots

1.16.

Overview of cobots by weight and payload

1.17.

Payload Summary of Cobots

1.18.

Cobot Cost Analysis

1.19.

Industry 5.0 - transformative vision for EU

1.20.

Robotics evolution

1.21.

Collaborative robots drive industry 5.0 - future factory

1.22.

Low-carbon society commitment from big robot manufacturers

1.23.

Cobot historic market size: 2019-2024

1.24.

Mobile cobot market size forecast: 2025-2045

1.25.

Cobot volume forecast by region: 2025-2045

1.26.

Cobot volume forecast table by region: 2025-2045

1.27.

Categorization of end-effectors

1.28.

Overview of end-effectors

1.29.

Cobot end-effectors market size forecast: 2025-2045

1.30.

Overview of the market - lack of differentiation and market opportunities

1.31.

Roadmap of Cobots

1.32.

Roadmap and Maturity Analysis of Cobots by Industry

1.33.

Overview of market drivers

1.34.

Overview of the OEMs and suppliers

1.35.

Global competitive landscape

1.36.

Differentiations of cobots

2.

INTRODUCTION

2.1.

Definitions of the key terms

2.2.

2.3.

Leading cobot manufacturers and recent collaboration

2.4.

Typical performance and cost characteristics of collaborative robotic arms

2.5.

The rise of 'collaborative' robotic arms: filling a market gap

2.6.

Spacing sharing & safeguarding: traditional vs collaborative

2.7.

Type of assembly operation

2.8.

Six stages of human-robot collaboration

2.9.

Stage One - what is not a collaborative robot?

2.10.

Stage Two - what is not a collaborative robot?

2.11.

Stage Three - laser scanner separation

2.12.

Stage Four - shared workspace no virtual guarding

2.13.

Stage Five - operators and robots working together

2.14.

Stage Six - Autonomous mobile collaborative robots

2.15.

Degrees of collaboration: spatial and/or temporal separation

2.16.

Single or dual arms?

2.17.

2.18.

Safety requirement - understanding biomechanical limit criteria

2.19.

Safety requirement for cobots - Power and force limiting

2.20.

Safety requirement for cobots - Speed and separation monitoring and safety monitored stop

2.21.

Safety requirement for cobots - hand guiding

2.22.

Safety requirement for cobots - soft impact design

2.23.

Robot safety standards of different regions

2.24.

3.

COBOT PLAYERS AND BENCHMARKING

3.1.

Benchmarking

3.1.1.

Key terms and performances expected from cobots

3.1.2.

Benchmarking of robots based on DoF, payload, weight, repeatability, reach, price, payload to weight ratio and ease of programming

3.1.3.

3.1.4.

3.1.5.

3.1.6.

Benchmarking of cobots - Degree of Freedom (DoF) = 6

3.1.7.

Benchmarking of cobots - Degree of Freedom (DoF) = 7

3.1.8.

Comparison of cobots - DoF = 6

3.1.9.

Average price per cobot by company - low-cost cobots

3.1.10.

Average price per cobot by company - medium-cost cobots

3.1.11.

Average price per cobot by company - high-cost cobots

3.1.12.

Porter's Five Force Analysis

3.2.

Differentiation Analysis of Cobots

3.2.1.

Lack of Differentiation Across Cobots

3.2.2.

Cobot Comparison

3.2.3.

How to assess the performance of cobots

3.3.

Cobot Players Analysis

3.3.1.

An overview of the value chain

3.3.2.

Major players - Switzerland

3.3.3.

Major players - Germany

3.3.4.

Major players - Japan

3.3.5.

Major players - USA

3.3.6.

Major players - Canada

3.3.7.

Major players - China

3.3.8.

3.3.9.

Major players - Others

3.3.10.

ABB - YuMi

3.3.11.

3.3.12.

ABB - GoFa

3.3.13.

ABB - SWIFTI CRB 1100-4/0.475 and CRB 1100-4/0.58

3.3.14.

KUKA - LBR iiwa series

3.3.15.

KUKA - LBR iiy and iiQKA Ecosystem

3.3.16.

Fanuc

3.3.17.

Fanuc - CR (collaborative robots) series - CR-4iA, CR-7iA, and CR-7iA/L

3.3.18.

Fanuc - CR (collaborative robots) series - CR-14iA/L, CR-15iA, CR-35iA, CRX-10iA and CRX-10iA/L

3.3.19.

Aubo Robotics - i series

3.3.20.

i-series - i16 and i20

3.3.21.

i-series - i3, i5, and i10

3.3.22.

DOBOT - CR series

3.3.23.

CR3, CR5, and CR10

3.3.24.

CR16 and M1 Pro

3.3.25.

End-effectors and other accessories - DOBOT

3.3.26.

St ä ubli - TX2touch series

3.3.27.

TX2touch-60 series

3.3.28.

TX2touch-90 series

3.3.29.

Yuanda Robotics - Yuanda robot

3.3.30.

Yuanda robot - Yu

3.3.31.

Universal Robots

3.3.32.

Universal Robots - UR(x)e series

3.3.33.

Universal Robots - UR3e

3.3.34.

Universal Robots - UR5e

3.3.35.

Universal Robots - UR10e

3.3.36.

Universal Robots - UR16e

3.3.37.

Universal Robots - UR20

3.3.38.

Universal Robots - UR30

3.3.39.

Universal Robots - system specifications

3.3.40.

Techman Robot

3.3.41.

SWOT - Techman Robot

3.3.42.

Omron

3.3.43.

Omron - TM5-700 and TM5X-700

3.3.44.

Omron - TM5-900 and TM5X-900

3.3.45.

Omron - TM12 and TM12X

3.3.46.

Omron - TM14 and TM14X

3.3.47.

F&P Personal Robotics

3.3.48.

SWOT - F&P Personal Robotics

3.3.49.

F&P Personal Robotics - P-Rob

3.3.50.

F&P Personal Robotics - Lio

3.3.51.

Kawasaki Heavy Industries

3.3.52.

duAro series

3.3.53.

Neura Robotics - Cognitive Cobots

4.

COBOTS BY INDUSTRIES

4.1.

Market Landscape Overview

4.1.1.

4.1.2.

Overview of Drivers

4.1.3.

4.1.4.

Cobot - Technical Pain Point - Not Just a Robot but the Integration of an Entire System

4.1.5.

System Integration of Cobots

4.2.

Automotive Industry

4.2.1.

Opportunities for collaborative robots in the automotive manufacturing industry

4.2.2.

Five challenges for SMEs

4.2.3.

4.2.4.

Challenges of automotive manufacturing

4.2.5.

The trend for Audi and Volkswagen digitization

4.2.6.

Fast increase of cobots usage in the upcoming decade because of policy and company strategy

4.2.7.

Fast increase of cobots usage - China

4.2.8.

COVID highlights the supply chain fragility and accelerate the cobot usage

4.2.9.

SWOT analysis of cobots in the APAC automotive industry

4.2.10.

SWOT analysis of cobots in the North American automotive industry

4.2.11.

More details of applications scenarios in the automotive manufacturing industry

4.2.12.

Case study: OPEL's engine assembly line with the aid of UR-cobots

4.2.13.

Case study: PSA's smart factory

4.2.14.

Case study: Ford - seam sealant injection

4.2.15.

Case study: Zippertubing

4.2.16.

Summary for automotive manufacturing

4.2.17.

Robotic Charging

4.2.18.

Cobot sales volume forecast in automotive industry

4.2.19.

Unit sales forecast of cobots for the automotive industry

4.3.

Food and Beverage Industry

4.3.1.

Challenges and requirements of 21st food and Fast-Moving Consumer Goods (FMCG) industry

4.3.2.

Challenges and requirements of 21st food and (FMCG) industry - key takeaways

4.3.3.

SWOT analysis of cobots in the food and beverage industry - Europe

4.3.4.

SWOT analysis of cobots in the food and beverage industry - Asia

4.3.5.

SWOT analysis of cobots in the food and beverage industry - North America

4.3.6.

Cobots for food and beverage industry are used for different purposes and tasks

4.3.7.

Case study: Nortura - palletizing

4.3.8.

Case study: Atria Scandinavia - packaging

4.3.9.

Forecast of cobots in the food and beverage industry

4.3.10.

Conclusion and outlook for cobots in the food and beverage industry

4.3.11.

4.4.

Electronics

4.4.1.

Challenges of 3C manufacturing in electronics

4.4.2.

Case study - Melecs EWS

4.4.3.

Main market is in China, and main tasks include picking and placing, palletizing, and quality inspection

4.4.4.

Cobots volume forecast in the electronics industry: 2025-2045

4.4.5.

Cobots volume forecast table in the electronics industry: 2025-2045

4.4.6.

Summary for 3C manufacturing

4.5.

Hospitality and healthcare

4.5.1.

Challenges on the hospitality and healthcare industry

4.5.2.

Cobots in the medical field

4.5.3.

Cobots in the healthcare industry - key takeaways

4.6.

Cobots in the Li-ion Industry

4.6.1.

Overview of cobots in the Li-ion manufacturing

4.6.2.

Benefits of cobots in the Li-ion manufacturing

4.6.3.

TOPSIS Analysis

4.6.4.

TOPSIS Analysis for Cobot Selection

4.6.5.

Use Cases - Fanuc America

4.6.6.

Integrating AI into cobots for better EV battery inspection

4.6.7.

Li-ion battery defects detection - Nissan Leaf 2011

4.6.8.

Comparison of robot and cobot capabilities for battery module inspection

4.6.9.

Time Reduction Enabled by Cobots

4.6.10.

Overview of cobots in the end-of-life Li-ion recycling for Nissan Leaf 2011

4.6.11.

EV battery disassembly process

4.6.12.

Challenges in computer vision for dismantling during disassembly

4.6.13.

Technical Pain Points of Cobots in Li-ion Battery Industry

4.6.14.

Commercial Pain Points of Cobots in Li-ion Battery Industry

4.6.15.

Yearly Volume Forecasts of Cobots in EV Li-ion Battery: 2024-2044

4.6.16.

Yearly Revenue Forecasts of Cobots in EV Li-ion Battery: 2024-2044

4.7.

Cobots in the photovoltaic Industry

4.7.1.

Overview of Cobots in the Photovoltaic Industry

4.7.2.

Use Case - Robotic Assembly of Photovoltaic Arrays (1)

4.7.3.

Use Case - Robotic Assembly of Photovoltaic Arrays (2)

4.7.4.

Use Case: Cobot welding tool for improved quality

4.7.5.

Barriers and solutions of cobots in the photovoltaic industry

4.8.

Cobots in the semiconductor industry

4.8.1.

Emerging sector: cobots in semiconductor industry

4.8.2.

Photomask Processing - Use Case

4.8.3.

Cobots in cleanroom - technical requirements and barriers

4.8.4.

Requirements of cobots used in cleanroom

4.8.5.

Future Trends of cobots in the semiconductor industry

5.

COBOTS BY TASKS

5.1.

Picking and Placing

5.1.1.

Picking and placing

5.1.2.

Machine tending

5.1.3.

Benefits and ROI for machine tending

5.1.4.

Packaging and palletizing

5.1.5.

Cobots volume forecast in packaging and palletizing: 2025-2045

5.1.6.

Cobots market size forecast in packaging and palletizing: 2025-2045

5.2.

Material Handling

5.2.1.

Processing tasks

5.2.2.

Finishing tasks

5.2.3.

Forecast of cobots market size and volume for surface processing: 2025-2045

5.2.4.

Forecast table of cobots for surface processing: 2025-2045

5.3.

Quality inspection

5.3.1.

5.3.2.

Cobots market size forecast in chip quality inspection: 2025-2045

5.4.

Summary of different tasks

5.4.1.

5.4.2.

Payback time/ROI by tasks

5.4.3.

Pain points and solutions for cobot adoption

5.4.4.

Barriers for cobot adoption

6.

KEY TECHNOLOGIES AND COMPONENTS IN COBOTS

6.1.

Overview

6.1.1.

Sensor-based control

6.1.2.

Typical sensors used for collaborative robots

6.1.3.

Flexible force/pressure sensors used for robotic soft grippers

6.1.4.

Brief introduction of technologies for tactile sensors in soft grippers

6.1.5.

Piezoresistive vs. Piezoelectric vs. Capacitive technologies

6.1.6.

What are printed piezoresistive sensors?

6.1.7.

What is piezoresistance?

6.1.8.

SWOT: Piezoresistive sensors

6.1.9.

Capacitive sensors

6.1.10.

Tactile sensors

6.1.11.

Capacitive proximity and tactile sensors - AIDIN Robotics

6.1.12.

Time-of-flight (ToF) sensors

6.1.13.

Challenges with traditional force sensors

6.1.14.

Force sensing - FRANKA EMIKA

6.1.15.

Robotic visual and force sensing

6.1.16.

Torque sensors

6.1.17.

Vision systems for cobots

6.1.18.

Vision systems in robots

6.1.19.

AIRSKIN

6.1.20.

AIRSKIN - further details

6.1.21.

SWOT - AIRSKIN

6.1.22.

AIDIN Robotics

6.1.23.

SWOT - AIDIN Robotics

6.1.24.

Tacterion

6.1.25.

SWOT - Tacterion

6.1.26.

Bruker Alicona

6.1.27.

SWOT - Bruker Alicona

6.1.28.

FRANKA EMIKA

6.2.

End-Effectors

6.2.1.

What are end-effectors and how are they used in different applications?

6.2.2.

Examples of the applications of end-effectors

6.2.3.

How to categorize end-effectors?

6.2.4.

6.2.5.

How do end-effectors change the robot and cobot industry?

6.2.6.

6.2.7.

ROBOTIQ

6.2.8.

OnRobot

6.2.9.

SWOT - OnRobot

6.2.10.

Schmalz

6.3.

Grippers

6.3.1.

Grippers - categorization based on actuation types

6.3.2.

Grippers with rigid fingers

6.3.3.

Soft grippers

6.3.4.

Actuation technologies for soft grippers

6.3.5.

Comparison of rigid and soft grippers

6.3.6.

Vacuum grippers

6.3.7.

Vacuum grippers - suction cup selection

6.3.8.

Magnetic grippers

6.3.9.

Emerging technologies: tactile sensors

6.3.10.

End-Effector - Suction Cups

6.4.

Surface Processing Tools

6.4.1.

Surface finishing

6.4.2.

Surface finishing with cobots could be ideal for SMEs

6.4.3.

Case study - ROBOTIQ surface finishing kit

6.5.

Computing platforms

6.5.1.

NVIDIA Isaac

6.5.2.

AMD - SOM

6.5.3.

Software and AI features - Universal Robots

6.5.4.

SWOT - AMD - SOM

6.6.

OEMs and Component Suppliers

6.6.1.

Key components and accessories

6.6.2.

6.6.3.

List of OEMs and suppliers

6.6.4.

6.6.5.

6.6.6.

6.6.7.

End-effectors by OEM

6.6.8.

Price of end-effectors by type

6.7.

Emergence of mobile cobots

6.7.1.

What are mobile cobots?

6.7.2.

Mobile collaborative robots - benefits

6.7.3.

Mobile collaborative robots - overview of limitations

6.7.4.

Applications of mobile cobots

6.7.5.

Mobile cobots - gaps and mismatches in accuracy

6.7.6.

Robotnik

6.7.7.

Other challenges of mobile cobots

6.7.8.

Collaboration of mobile robot suppliers and cobot suppliers

6.7.9.

Mobile collaborative robots market size forecast: 2025-2045

6.8.

Integration of AI in Cobots

6.8.1.

Overview of AI-Driven Cobots

6.8.2.

Cognitive Cobots - Neurac Robotics

7.

TECHNICAL AND COMMERCIAL BARRIERS AND SOLUTIONS

7.1.

Commercial Barrier - Metrics to Consider

7.2.

Technical Barriers - Metrics to Consider

8.

FORECASTS

8.1.

Methodology and assumptions for forecasts

8.2.

Illustration of S-curve

8.3.

Historic cobot market size: 2019-2024 (what are the COVID impacts)?

8.4.

Cobot market size forecast: 2025-2045

8.5.

Cobot volume sales forecast: 2025-2045

8.6.

Market share of cobots (volume) by regions: 2019-2043

8.7.

Market share of cobots (revenue) by regions: 2025-2045

8.8.

Regional Cobot Volume Forecast: 2025-2045

8.9.

Cobots Volume Forecast for APAC: 2025-2045

8.10.

Cobots Volume Forecast for Europe: 2025-2045

8.11.

Cobots Volume Forecast for North America: 2025-2045

8.12.

Cobot revenue forecast by regions: 2025-2045

8.13.

8.14.

8.15.

Cobot volume forecast in automotive industry: 2025-2045

8.16.

Cobot volume forecast in the automotive industry: 2025-2045

8.17.

Cobots in chip quality inspection

8.18.

Cobots volume forecast for chip quality inspection: 2025-2045

8.19.

Market size forecast of cobots by 12 applications: 2025-2045

8.20.

Cobot market forecast (US\$ millions) tables by end-user industry: 2025-2045

8.21.

Cobot volume forecast (thousands) by end-user industry: 2025-2045

8.22.

Cobot market forecast tables by end-user industry - Volume (thousands)

8.23.

Volume forecast of cobots by tasks: 2025-2045

8.24.

Cobot volume forecast table by tasks: 2025-2045

9.

PROFILES

9.1.

ABB

9.2.

9.3.

AMD Xilinx — KR260 Starter Kit for Various Robotic Applications

9.4.

9.5.

Denso — New Market Player in the Cobot Industry

9.6.

9.7.

Franka Emika

9.8.

Kassow Robots

9.9.

Kawasaki — Industrial Robots and Tactile Skin on Cobots

9.10.

KUKA — Solutions to Cobots, Digitalisation, and Sustainability

9.11.

Neura Robotics

9.12.

Omron — Cobot with an End-Camera

9.13.

OnRobot A/S

9.14.

9.15.

St ä ubli — Demonstrating a Full Solution for Future Factories

9.16.

9.17.

Techman Robot — A Major Cobot Player

9.18.

Universal Robots — The Largest Cobot Player

9.19.

Vikaso Robotics

9.20.

Yaskawa — Leading Player of Industrial and Collaborative Robots

About IDTechEx reports

What are the qualifications of the people conducting IDTechEx research?

How does IDTechEx gather data for its reports?

What is your forecast methodology?

- Historic data, based on our own databases of products, companies' sales data, information from associations, company reports and validation of our prior market figures with companies in the industry.
- Current and announced manufacturing capacities

- Company production targets
- Direct input from companies as we interview them as to their growth expectations, moderated by our analysts
- Planned or active government incentives and regulations
- Assessment of the capabilities and price of the technology based on our benchmarking over the forecast period, versus that of competitive solutions
- Teardown data (e.g. to assess volume of materials used)
- From a top-down view: the total addressable market
- Forecasts can be based on an s-curve methodology where appropriate, taking into account the above factors
- Key assumptions and discussion of what can impact the forecast are covered in the report.

How can I be confident about the quality of work in IDTechEx reports?

What differentiates IDTechEx reports?

Why should we pick IDTechEx research over AI research?

How can I justify the ROI of this report?

Can I speak to analysts about the report content?

What is the difference between a report and subscription?

Before purchasing, I have some questions about the report, can I speak to someone?

About IDTechEx

Who are IDTechEx's customers?

Where is IDTechEx established?

Questions about purchasing a report

How do I pay?

How and when do I receive access to IDTechEx reports?

How do I assign additional users to the report?

Can I speak to someone about purchasing a report?
