One cohesive platform. Endless applications.

Your most vital automation needs, met. Our solutions are designed to make your team as competitive and efficient as possible.

[Deploy Digit](#)

[Digit](#)

The first humanoid to prove real value at scale, Digit is a tireless partner for your team. It connects islands of automation in your facility, and addresses hard to fill labor gaps in your industry. Designed to excel in spaces where people already work.

[Digit Details](#)

[Arc](#)

Our cloud based automation platform. Arc connects Digit to your existing warehouse automation—including AMRs and management and execution systems—so integration is seamless. Monitor robot workflows, view live metrics, and manage your entire fleet with ease.

[Arc Details](#)

[Service and support](#)

Our commitment doesn't stop at deployment. We back every relationship with on-site service, online support, and real-time monitoring, all powered by a global support infrastructure built to keep your operations on track.

Extensive existing capabilities and an ambitious product roadmap

Repetitive. Dangerous. Load intensive. The first wave of skills we programmed Digit to excel at are the ones needed most in industrial labor. But Digit's design was based on a human-centric form factor for a reason—it can operate wherever people need help most. Using simulation and learning frameworks, adopting new capabilities is easier than ever.

The Future of Manufacturing: Humanoid Solutions For the Modern Industrial Workforce

“ Collaborative robotics solutions like Digit support workplace safety and help Amazon deliver to customers faster, while creating new opportunities and career paths for our employees. ”

Emily Vetterick

Director of Engineering, Amazon

“ It ’ s energizing to see automation developing that can perform repetitive tasks with speed and precision working with our associates to provide a better workplace. ”

Christy Hillier

Senior Director of Operations, GXO

“ Implementing innovative manufacturing solutions is crucial to be successful. Here, humanoids play an important role. We, at Schaeffler, will integrate this technology into our operations and see the potential to deploy a significant number of humanoids in our global network of 100 plants by 2030. ”

Andreas Schick

Chief Operating Officer, Schaeffler

Expanding your impact, industry by industry.

Manufacturing. Logistics. Distribution. We ’ ve earned our first deployments in environments where safety can't slip and downtime isn't an option. What we learned there prepared us for what comes next.

Digit

[Access Spec Sheet](#)

Designed to excel in spaces where people already work, Digit ’ s human-centric form factor means that manufacturing floors and warehouse spaces don ’ t have to be redesigned. It ’ s a solution that ’ s ready to help today.

[Adaptable](#)

Digit can walk into existing facilities and address the hardest-to-automate portions of your workflows. With interchangeable end effectors and AI-powered learning, it can evolve to changing needs.

[Durable](#)

Digit has a 35 pound carrying capacity, 4 hour battery life, and the capability to work continuous shifts. It ’ s designed to endure strenuous conditions on the most difficult assembly lines.

[Trustworthy](#)

None of Digit ’ s capabilities would matter if it wasn ’ t safe to be in your facility. That ’ s why our team worked with industry experts to develop safe and cooperative behaviors required for deployment at scale.

Arc

Arc distills humanoid robotics from complex technology into practical, accessible tools that operations teams can deploy and manage with confidence. As the cloud-based platform powering every Digit deployment, Arc eliminates traditional barriers to adoption through intuitive design, rapid integration, and enterprise-grade reliability.

[Intuitive](#)

Arc provides a centralized command center for your automated workforce. Real-time fleet management gives you complete visibility into operations. Monitor robot status, track productivity metrics, manage task assignments, and optimize workflows.

[Integrated](#)

Connectivity to existing warehouse management, execution, and manufacturing systems is seamless. Arc deploys quickly alongside Digit, getting your humanoid workforce operational with minimal disruption.

Secure

Cloud-native architecture provides industry-leading security through encrypted comms, single sign-on, and role based access controls. Arc is designed to protect your data, while enabling the flexibility of cloud deployment.

Service and Support

Deploying Digit means gaining a dedicated partner committed to your operational success. Our service and support teams guide you through every stage of your automation journey, from initial planning through facility-wide expansion.

Deployment begins with white-glove delivery and hands-on robot training. Our specialists work alongside your team to ensure smooth adoption, providing the operational knowledge and workflow optimization strategies that maximize success from day one.

Once your fleet is operational, our commitment deepens. Our global support infrastructure allows us to provide rapid response on-site. Regular software updates continuously enhance performance and unlock new capabilities. And when you're ready to scale, our solution support team helps you expand operations to new workflows and sites.

This is more than a transaction—it's a joint effort to drive your success.
