Product

Somerville, MA, USA

Founded in 2011 by graduates of MIT and RISD, RISE™ Robotics is an innovative technology company that is leading the way to Zero Emission heavy machinery by providing the world's most efficient and productive alternative to hydraulics. Backed by The Engine, a Tough Tech venture capital fund from MIT, Greentown Labs, and Techstars, and partnering with Tier 1 suppliers, OEMs, and the U.S. Department of Defense, RISE is powering the shift toward sustainable energy using their unique Beltdraulic™ technology, an efficient, eco-friendly alternative to traditional hydraulic systems that reduces fuel consumption, cuts emissions, and extends the lifespan of machines. This is a unique opportunity to get hands-on experience in technology that 's changing the future of heavy machinery.

To support the growth and success of the RISE technology, we are looking for a Product Manager Intern to join our team. This role offers an exciting opportunity to gain hands-on experience in product management, contributing to the development and success of our robotic motion control systems. Working closely with cross-functional teams you will support product lifecycle activities and assist in roadmap planning, ensuring that customer needs are at the forefront of product decisions. Ideal candidates are motivated problem solvers who thrive on technical challenges and are eager to grow within a collaborative environment. This is a full-time, 30-40 hours/week internship onsite in our Somerville office for the Spring semester.

In this role, you will...

- Conduct research and gather insights on market trends, competitors, and customer needs to inform product decisions.
- Assist in creating and documenting product requirements and help define new features.
- Track and analyze product data to suggest improvements.
- Help coordinate product launches and keep projects on track.
- Work closely with team members across engineering disciplines to integrate and engage in regular project meetings to align on product development.

A Home for Tough Tech Founders.
